

Figure 1 is a line graph titled "Percentage of total population in the labor force by age group, 1970-1990". The Y-axis represents the percentage of the total population in the labor force, ranging from 0 to 100. The X-axis represents the year, ranging from 1970 to 1990. There are six data series representing different age groups: 15-24, 25-34, 35-44, 45-54, 55-64, and 65+. The 15-24 age group shows a significant increase from approximately 15% in 1970 to a peak of about 25% in 1980, followed by a decline. The 25-34 age group shows a corresponding decrease from approximately 25% in 1970 to about 15% in 1980, followed by a slight increase. The 35-44 age group shows a steady increase from approximately 20% in 1970 to about 30% in 1990. The 45-54 age group shows a slight decrease from approximately 20% in 1970 to about 15% in 1990. The 55-64 age group shows a slight decrease from approximately 15% in 1970 to about 10% in 1990. The 65+ age group shows a sharp increase starting around 1980, reaching approximately 10% by 1990.
